PROFESSIONAL SUMMARY

Full-stack Software Engineer with expertise in Java/Spring Boot and modern JavaScript frameworks, specializing in building secure, scalable services-based applications. Strong background in developing enterprise-level solutions with a focus on performance optimization and user experience. Demonstrated track record of solving complex technical challenges and effectively communicating technical concepts across teams. Combines analytical problem-solving abilities with collaborative skills to deliver high-impact software solutions across healthcare, education, and financial technologies. Open to relocation and fully flexible to move to any location as required by the role or business needs.

TECHNICAL PROFICIENCIES

Programming Languages: Java, TypeScript, JavaScript, Python

Web Technologies: Spring Boot, Node.js, Express.js, Flask, Next.js, React, Angular, REST APIs, Microservices, WebSockets

Cloud & DevOps: Docker, CI/CD, Jenkins, GitHub Actions, AWS, GitLab CI/CD, SonarQube

Databases: MySQL, PostgreSQL, MongoDB, SQL, NoSQL

Tools & Frameworks: Linux, Git, Neovim, Maven, Gradle, Mockito, JUnit, Vitest, Markdown, Postman

Soft Skills: Agile Methodologies, Problem Solving, Collaborative Development

PROFESSIONAL EXPERIENCE

Software Engineering Apprentice [Cert](#)

Worldline Global

November 2024 – May 2025

Technical Apprenticeship Program

- Completed intensive 6-month full-stack development apprenticeship focused on enterprise application architecture and microservices development
- Developed RESTful APIs and microservices using Spring Boot and Java 8+ features including Lambda expressions, Streams, and Functional interfaces
- Built responsive front-end applications with Angular, implementing reactive forms, component-based architecture, and state management
- Implemented CI/CD pipelines using Jenkins and GitLab CI with automated testing and code quality analysis via SonarQube
- Designed and optimized database schemas for both SQL (PostgreSQL) and NoSQL (MongoDB) databases, implementing advanced queries and performance optimization
- Utilized Linux systems administration skills for deployment and server management, including shell scripting for automation
- Applied OOP principles in Java and C++ development, including design patterns such as Singleton, Factory, and Builder patterns
- Created comprehensive test suites using JUnit and Mockito for backend and end-to-end testing frameworks for frontend

Backend Development Intern [Cert](#)

Valsco Technology Pvt. Ltd.

August 2023 – September 2023

Software Engineering Internship

- Optimized website SEO, achieving top 5 Google search ranking through strategic implementation
- Executed web scraping using Puppeteer for efficient database seeding
- Integrated third-party payment gateway, enhancing platform's payment capabilities

Technical Teaching Assistant [Cert](#)

Apna College (JainEMO Pvt. Ltd.)

Oct. 2023 – Jan. 2024

Technical Support & Mentorship

- Mentored 4,000+ students, providing technical guidance and doubt resolution
- Maintained 5-star rating through comprehensive technical support

PROFESSIONAL PROJECTS

- Cervix Cancer Predictor** — HackForHer-Health [GitHub](#) November 2024
- Architected scalable services using Spring Boot and Flask, implementing domain-driven design
 - Developed machine learning-powered cervical cancer prediction system with secure patient-doctor communication
 - Implemented JWT-based authentication using Spring Security and other features: one-on-one real-time chat, medical-case creation, questionnaire submission with doctor feedback
 - **Technologies:** *Spring Boot, Flask, PostgreSQL, Spring Security, Machine Learning, Docker*
- Enterprise School Management System** Oct. 2023 – Apr. 2024
- Engineered comprehensive school management platform handling 1200+ student records
 - Implemented modular architecture with tRPC for type-safe API communication
 - Developed scalable features: Fee Management, Attendance Tracking, Notification System
 - **Technologies:** *Next.js, Prisma ORM, AWS EC2, TypeScript, MySQL*
- Full-Stack Recipe Sharing Platform** — Forklify [GitHub](#) September 2023
- Developed scalable full-stack application with comprehensive CRUD operations
 - Implemented secure user authentication using NextAuth.js
 - **Technologies:** *Next.js, MongoDB, Prisma, NextAuth.js, Material UI*
- Cross-Platform Expense Tracker** [GitHub](#) October 2023
- Created cross-platform mobile application with state management using Redux
 - Implemented real-time data synchronization with Firebase
 - **Technologies:** *React Native, Redux, Firebase, Expo*

EDUCATION

- Vellore Institute of Technology** Tamil Nadu, India
Bachelor of Technology in Information Technology CGPA: 9.00/10 2021 – 2025
- Flora Dale School** Delhi, India
Senior Secondary Education CBSE (XII) Percentage: 94.4% 2021
Higher Secondary Education CBSE (X) Percentage: 93.8% 2019

PROFESSIONAL CERTIFICATIONS

Software Development Certifications:

- Java Spring Boot 0 to 100
- Advanced Web Development Bootcamp
- Next.js 13 Advanced Techniques
